Bucharest, Romania · contact@teodorlutoiu.com · +40 725 697 859 · teodorlutoiu.com · linkedin.com/in/teodorlc · github.com/tiXor-code

Summary

AI automation engineer who ships end-to-end systems: LLM orchestration, RAG, retrieval pipelines, n8n workflows, and the production glue around Azure OpenAI, Claude, and embeddings. Built and shipped a customer-support draft agent with an HMAC webhook to classify, embed, retrieve, draft, and grade flow, plus the ICP Agent prospecting service on Vercel.

Experience

Ministeru' Creativ — Founder

Mar 2026 – Present · Bucharest, Romania (remote-first)

- Founded and run a 4-person creative agency; live since 2026-03-18 at ministerucreativ.com / .ro.
- Built an internal AI prospecting dashboard with an n8n side-pipeline (Q1 2026 experiment).
- Lead client delivery across web, branding, content, and automation.
- Own all infrastructure: domain, hosting, CI/CD, analytics.

Electronic Arts Sports (EA FC 25 — Ultimate Team) — Assistant Content Producer

Aug 2024 – Present · Bucharest, Romania

- Developed and executed content strategies, significantly enhancing player engagement and retention.
- Facilitated seamless cross-functional collaboration, optimizing live service updates and content releases.
- Utilized data-driven insights to boost player satisfaction and key performance metrics.

Play For Democracy — Arden — Game Producer

Sep 2023 – Aug 2024 · Bucharest, Romania

- Transitioned from Game Designer to Producer, successfully managing project milestones and launch.
- Streamlined development processes through Agile methodologies, achieving a 30% reduction in project timelines.
- Represented the project publicly, meeting all stakeholder KPIs and enhancing market visibility.
- Invited to Brussels by the European Commission to present the project.

Projects

Customer Support Draft Agent — n8n, Azure OpenAI, Supabase pgvector, Claude CLI, HMAC

AI customer-support draft generator with self-grading verdict gate

- End-to-end pipeline: HMAC webhook -> n8n -> classify -> embed -> pgvector RAG -> Claude draft -> self-grade -> multi-signal verdict gate.
- 136 tests across 5 layers including verdict-gate truth table extracted from the workflow JSON.
- 12/12 eval agreement, 6/12 auto-rate at calibrated thresholds.

ICP Agent — Hono, Vercel, Azure OpenAI, Hunter, SerpAPI, Google Sheets

Ideal-customer-profile prospecting service deployed on Vercel · icp-agent-ten.vercel.app

- One-shot prospecting agent: scrapes signals, scores ICP fit, returns enriched leads to Sheets.
- Built with Hono on Vercel; integrates Hunter and SerpAPI for enrichment and Azure OpenAI for scoring.

cv-tailor — Python, Azure OpenAI, WeasyPrint, Jinja2, gspread

JD-to-PDF tailored CV generator with Sheets-backed application CRM

- Single Azure OpenAI call returns structured JSON that drives a deterministic CV renderer.
- Honesty guard in the system prompt prevents the LLM from inventing experience, projects, or skills.
- ATS-safety pipeline runs pdftotext extraction plus six sanity checks (headings order, contact placement, mangling, etc.).
- Built TDD-style; 33 tests across 9 modules; full subagent-driven implementation workflow.

GEPA Prompt Lab — Python, Azure OpenAI, GEPA, eval design

Prompt-optimization tooling for JobMap LLM pipelines · github.com/tiXor-code/gepa-prompt-lab

- Iteratively optimizes prompts driving JobMap's admin and ingestion pipelines.
- GEPA-style genetic prompt evolution with per-prompt eval scoring.
- Measurable lift on enrichment accuracy and corrective-protocol output quality.

JobMap (how-to-get-a-job.com) — Next.js, Flask, Azure Postgres, Azure App Services, GitHub Actions OIDC, Stripe

Job-search platform with multi-agent admin pipeline · how-to-get-a-job.com

- 9.3K jobs, 504 skills, 247 admin tests, paid corrective-protocol product live.
- Council Step Pipeline shipped 2026-03-09 (PR

Skills

Languages: Python, TypeScript, JavaScript, Node.js, SQL

Frameworks: Next.js, React, Flask, FastAPI, Hono

Ai: Azure OpenAI, Claude API, RAG, embeddings, pgvector, agentic workflows, multi-agent systems, AI system architecture, AI automation, prompt engineering, eval design

Data: Postgres, Supabase, pgvector, Google Sheets

Devops: Azure App Services, Vercel, GitHub Actions (OIDC), n8n, Docker, Cloudflare

Tools: Git, Figma, Stripe, Playwright, MCP, Agile, Scrum, API design, API integration

Leadership: Technical leadership, Client delivery, Stakeholder communication, Cross-functional collaboration, Program management

Education

BSc Computer Games Design and Development — University of Worcester · 2022

Dissertation "AI in Games" (predates the LLM wave).
